CONTENTS

Periglacial Environments: Past, Present and Future. Łódź periglacial symposium.
Program of the symposium.

Anniversary session on 50 years of periglacial research in the framework of a
Periglacial Commission: historical overviews and future prospects

A. PISSART: The UGI Periglacial Commission and its role from 1949 until 1980	7
H. M. FRENCH: From heroic expeditions to modern field programs in periglacial environments	13
J.-P. LAUTRIDOU: La contribution des experiences en laboratoire aux recherches périglaciaires: histoire, acquis et perspectives	23
J. VANDENBERGHE: Periglacial research: jumping between process and environment	27
L. STARKEL: Polish roots of periglacial research	37
K. TURKOWSKA: Some reflections on the Łódź contribution to periglacial research and evaluation criteria of periglacial morphogeny in middle Poland	43
Paper and poster sessions	
B. ANTCZAK-GÓRKA: Wind-faceted stones within the maximum limit of the last ice sheet in southern Wielkopolska and the periglacial phenomena concurrent with them	63
S. A. HARRIS: Heat transfer process at the lower limit of alpine permafrost, Marmot Basin, Jasper National Park, Canada	73
C. KASSE: Can involutions be used as palaeotemperature indicators?	95
E. KOLSTRUP: A re-evaluation of the use of relict periglacial structures to derive quantitative palaeoclimatic values	111
Z. RĄCZKOWSKA: Slope dynamics in periglacial zone of the Tatra Mountains	127
B. VAN VLIET-LANOË: Comparison between cryogenic and co-seismic or neotectonic deformations: implications for the European permafrost	135
P. WORSLEY: Ice-wedge cast investigations in the British Isles 1849-1949	151
R. ŻURAWEK: Relict rock glaciers of the Central European Mid-Mountains	163
